

PHARMACIST PROFESSION

Giacomo Leopardi

Presidente della Federazione degli Ordini dei Farmacisti Italiani

In the fall of 2006, FOFI (Federazione degli Ordini dei Farmacisti) produced an official document which contains the profiles of different fields of expertise within the large frame of the term “Pharmacist Profession”. Besides the traditional positions of Community Pharmacist and Hospital Pharmacist, new ones can be defined even as a consequence of the new law which in Italy allows OTC drugs to be sold outside the pharmacy. These different positions will be discussed from a double point of view: that of the daily job and the one of the necessary technical and scientific backgrounds.
