

THE SPECIALITY EDUCATION IN PHARMACOLOGY

Enzo Chiesara

Department of Pharmacology, Chemoterapy and Medical Toxicology “E: Trabucchi”,
University of Milan, Via Vanvitelli 32, 20129, Milan

The DM 1st 2005 and the adjusting one of March 3rd 2006 present complicated problems, both organizing and scientific, to the specialized professional qualification of health area workers. Particular in the case of pharmacological specialized qualification, and mostly for the medical pharmacology school, these problems are magnified by the partial lack of professional possibilities and by its unclear and sometimes competitive supporting position.

Trasversal cultural aspect of pharmacology will be considered and it will be shown the point of view of SIF and of various associations on the practical utility of pharmacology specialist and his introduction into that specific activity linked to professionalism indicated by DM of August 1st, 2005.
