2nd European Summer School on Clinical Pharmacology

September 11-15

2003

Budapest

Hungary

Dear Colleague,

it is my pleasure to announce the 2nd European Summer School on Clinical Pharmacology jointly organized by the European Association for Clinical Pharmacology and Therapeutics (EACPT) and the Hungarian Society for Experimental and Clinical Pharmacology (MFT).

The success of the 1st European Summer School on Clinical Pharmacology held in Antalya, Turkey in 2001 motivated the EACPT to introduce a curriculum of Summer Schools to be hold every year and located in different countries.

The aim of the Summer School is to improve the knowledge and skills of young colleagues interested in clinical pharmacology. The School gathers the attendants from the host country and her region primarily. Distinguished lecturers are invited from Europe and the host country. The lectures cover broad aspects of clinical pharmacology.

Hungary is a traditional meeting point for scientists in Europe. People are friendly, the landscape is beautiful and the climate in September is usually mild. Budapest, the capital of Hungary has 2 million inhabitants. The city is called the "Pearl of Danube" by many visitors.

I encourage you to join the Summer School 2003 in Budapest!
